

Three Passes Moon Sketch Activity

Name: _____

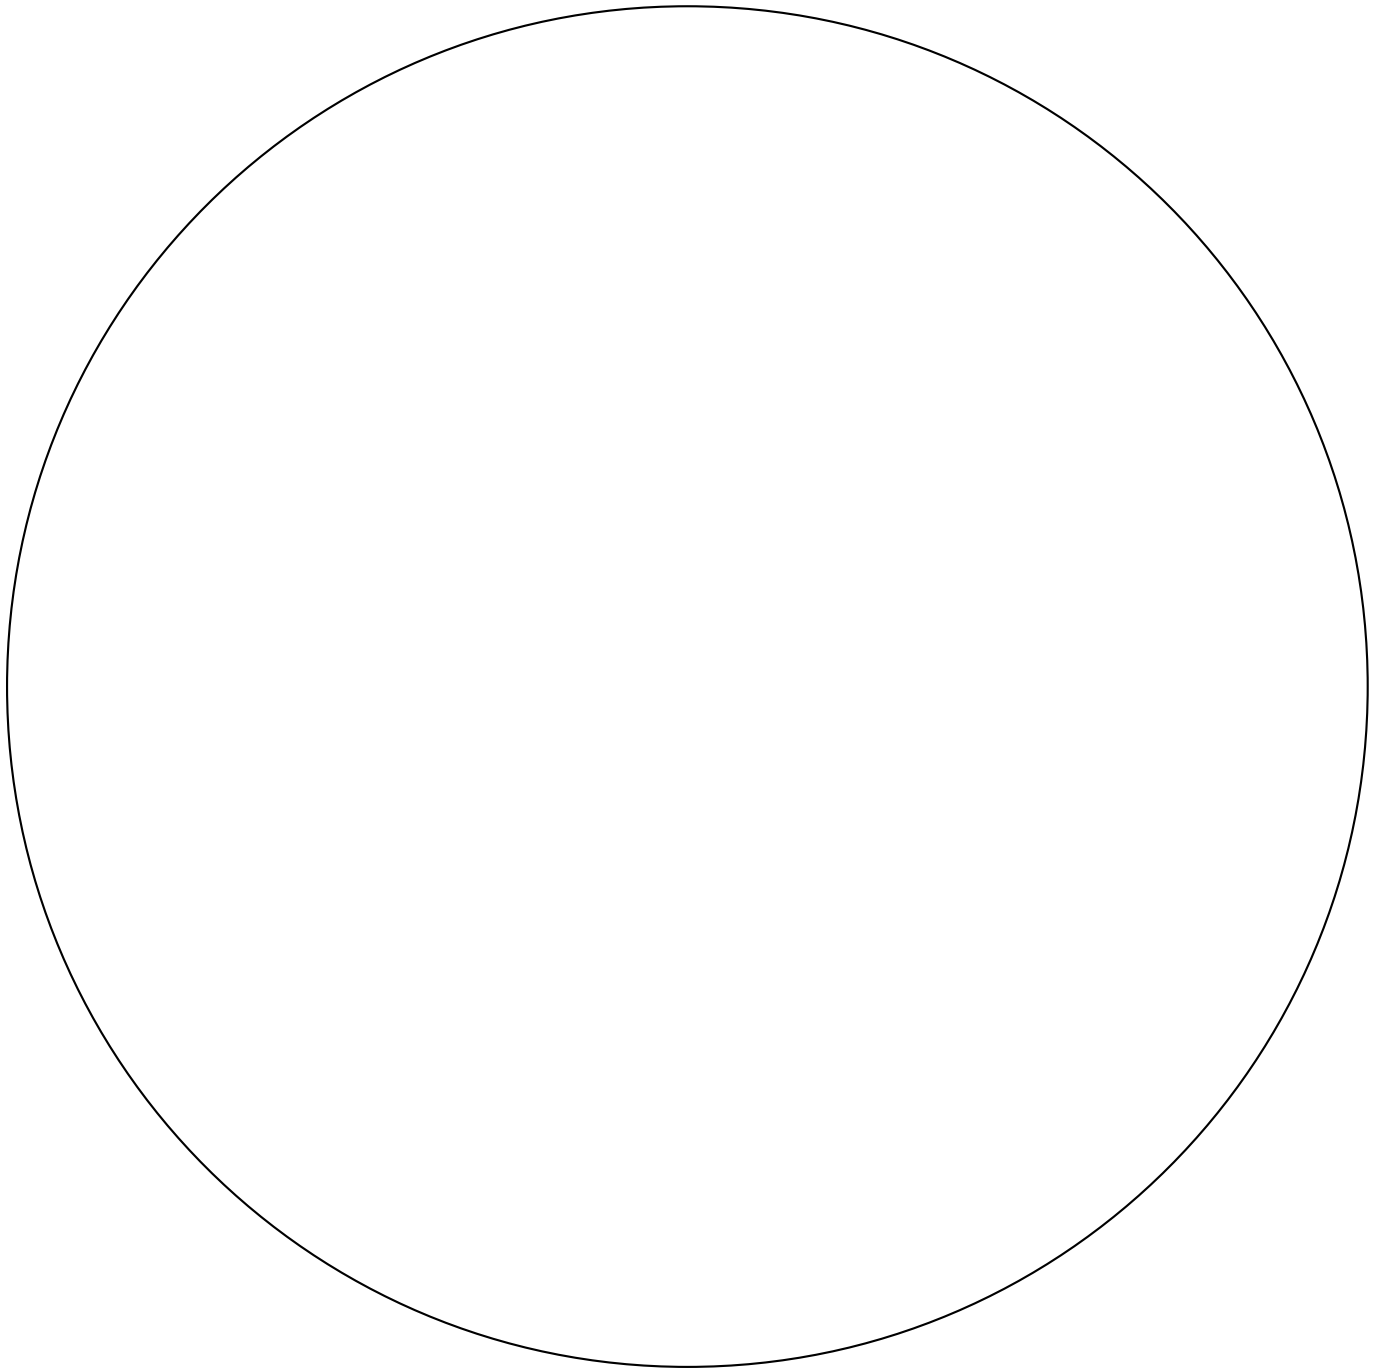

Pass 1: Quick sketch - focus on major dark and light areas only

Pass 2: Add detail - refine shapes, add prominent craters and features

Pass 3: Final version - clean up details, add smaller features

Reflection: How did your sketch improve from Pass 1 to Pass 3?

Lunar Features to Label

After completing your three sketches, use your best sketch (Pass 3) to label as many of the following features as you can identify:

1. **Mare Tranquillitatis** (Sea of Tranquility) - Where Apollo 11 landed
2. **Mare Imbrium** (Sea of Rains) - Large dark area in upper portion
3. **Oceanus Procellarum** (Ocean of Storms) - Largest dark area on left side
4. **Mare Serenitatis** (Sea of Serenity) - Dark area in upper right
5. **Mare Crisium** (Sea of Crises) - Oval dark area on right edge
6. **Tycho Crater** - Bright crater with prominent rays in southern region
7. **Copernicus Crater** - Prominent crater in Oceanus Procellarum
8. **Mare Orientale** (Eastern Sea) - Dark area on western limb
9. **Montes Apenninus** (Lunar Apennine Mountains) - Mountain range
10. **South Pole** - Bottom of the Moon

Bonus Features (if you can identify them):

- Aristarchus Crater (brightest spot on the Moon)
- Mare Vaporum (Sea of Vapors)
- Kepler Crater
- Mare Nubium (Sea of Clouds)
- Mare Fecunditatis (Sea of Fertility)

Assessment: Circle how many features you successfully labeled:

1-2 3-4 5-6 7-8 9-10 10+
