

5. Origin of the Moon

1. Suppose the force of gravity between two objects is 50 Newtons. If the distance between the objects decreases by a factor of five, and the mass of one of the objects is tripled, the force of gravity will become _____Newtons.
2. Is the composition of the Moon similar to the Earth?
Is the composition of the Moon similar to an Asteroid?
Is the composition of the Moon similar to the Earths Mantle?
Is the density of the moon similar to the Earth?
Are oxygen isotope ratios of the Earth and Moon similar?
3. What are four possible hypotheses of how we got the moon? Which one do we favor?
4. What determines the strength of the force of gravity between two objects?
5. Sketch three pie charts showing oxygen isotope ratios for the (1) The Earth, (2) The Moon, and (3) the Planet pluto
